DISPLAY PACK MOVING TO NEW FACILITY

GRAND RAPIDS, MI, FEBRUARY 20, 2015: Victor Hansen, President of Display Pack, a national provider of consumer packaging services to some of the world's top brands, announced that the company has purchased and will be moving to a new 406,000-square-foot facility. The Cedar Springs, Michigan facility, consisting of 360,000 square-feet of manufacturing space and 46,000 square-feet of mezzanine space, is currently occupied by Wolverine Worldwide, a global footwear and clothing maker who uses it as distribution center. Display Pack plans to transition into the facility, located just north of Grand Rapids, as Wolverine winds down its current operations.

"The growth we have been going through mandated we find a bigger, more suitable facility," Hansen said. "Our plastic packaging division alone has grown 85 percent over the past three years; and due to our aggressive growth strategy it's impossible to keep up with that growth at our present facilities."

Display Pack, foresees adding approximately 50 more jobs as it transitions into the new site. The types of jobs that will be available include Thermoforming operators, Quality and Project Engineers, Customer Service Reps, Mold Designers, CNC Operators and Material Handling/Warehouse Workers, just to name a few."

Display Pack recently sold its current home, a five story, 375,000-square-foot building in Grand Rapids, which it has occupied since 1979, to Naperville, Illinois-based Franklin Partners who is considering using the building as either high-tech office space or an apartment building.
