

FRESHNESS YOU CAN SEE,
PACKAGING YOU CAN

TRUST[®]

Round Deli Containers

Your answer for quality engineered High Pressure
Food Processing ready packaging.

You've perfected your product.
We've perfected how to showcase it.

Choose Display Pack's Round Deli Containers For:

HPP OPTIMIZED PACKAGING

We're good under pressure.

High pressure processing preserves foods and significantly improves quality and taste when compared to thermal treatment or chemical additives¹. However, this demanding process also requires containers that are flexible enough to resist cracking during processing but resilient enough to prevent crushing².

That's where Display Pack's engineering expertise comes in. Our round deli containers are specifically designed to withstand 87,000 pounds per square inch of pressure during rigorous high pressure food processing (HPP). Our compression tested & proven containers also feature a wide, consistent flange to facilitate lidding film application and prevent recontamination of food after processing³. The corresponding over-snap deli lids keep contents secure through the product journey from manufacturing facility to stacking on store shelves all the way to consumer's carts.

PRIMED FOR YOUR PRODUCTION LINE

During our round deli packaging development process, our engineering team collaborated extensively with national dip brands to ensure premium performance through every step of the automated food production process. From easily feeding through your automated filling equipment to saving you time & resources by eliminating the need for traditional shrink banding, we've ensured that our packaging works for you.

SUSTAINABILITY

Our round deli packaging offerings are manufactured in a post-industrial recycled & FDA approved PET material. These containers feature a #1 recycle code indicating their wide acceptance through traditional curbside recycling programs. Combine packaging recyclability with the shelf life extension benefits of HPP and you're on your way to reducing food + packaging waste and appealing to today's conscious consumer².
