

# Leading the Industry in Sustainable Packaging Manufacturing

At Display Pack, we believe that our responsibility extends beyond providing exceptional products. We firmly believe that embracing sustainable practices in every aspect of our business is the key to creating a positive impact on the world around us, enabling us to empower people and drive meaningful change.

From materials sourcing to product design and manufacturing, sustainability is an integral part of our business. We maintain a highly efficient manufacturing process by optimizing our operations for diversion, recovery, and recyclability while investing in innovative technologies that reduce waste, conserve energy, and lower emissions. And, our state-of-the-art facility continues to improve on our 90% landfill diversion rate as we work to become a zero-waste facility.

As we look ahead, Display Pack aims to lead the packaging industry in sustainability while continuing to deliver innovative solutions to our customers.

We recover more than

**20 MILLION POUNDS**

of scrap annually

That's enough to fill approximately

**4 OLYMPIC-SIZED SWIMMING POOLS**

each year

# We Design for **Recyclability**

Our custom solutions are designed for recyclability by prioritizing sustainable materials and innovative designs that reduce waste and energy consumption. From resin selection to pallet configuration for shipping and end-of-life disposal, we focus on sustainability along the entire product lifecycle.

Did you know that food waste is the single largest material found in landfills across the U.S. and contributes to greenhouse gas emissions? Plastic food packaging is a crucial element in reducing food waste and can nearly triple the amount of time a fruit or vegetable remains fresh.

For every one pound of plastic packaging, 1.7 lbs. of food waste is prevented.

## Together, We Reach Our Goals

We are proud to collaborate and partner with organizations committed to environmental conservation initiatives. Through local collaborations and environmental stewardship, we work to raise awareness and drive meaningful change.

## Where **Sustainability** Meets Innovation

We invite you to learn more about our sustainable packaging solutions and how we can work together to create a more sustainable future.

Join us as we push for a greener tomorrow—one package at a time.
